ATARI ST. This game can only be played with a joystick.

INTRODUCTION:

Greetings friends, I d like you to cast your minds forward to the future.... Its 2124 and not a good year. Just about everything that makes life pleasant is running out or running down. The serious people at WEC (that's the World Energy Commitee) have formulated THE PLAN to get round the problem.

THE PLAN is WEC Colony Plan, it involves ten really big, like enormous, colony ships. They're going to use a Meason Accelerator (a go faster gadget) to throw them to the far corners of the Universe. A long way. 'Cos thats where the energy is.

Later.....

Well that was the idea. However, the incredibly evil, his foulness on high, The Emperor Hades had his own plans. From his horribly burnt out bum of a planet fortress, called Sodini, he despatched his entire battle fleet. Their orders were to wait at the arrival co-ordinates of the earth ships, enslave the crews and sell the ships for scrap.

Only Colony 7 escaped the net, on account of a computer malfunction, which mean't they're-materialised two years before the Hadian fleet arrived. Colony 7 immediately began searching for new energy sources and stumbled across what we all know as the Orion Nebula. Only it wasn't the Orion Nebula any more. Hades had renamed it after himself and set up mining facilities.

So, here we are Hades Nebula about to fight for the right to save earth. That's where you come in. We, on Colony 7 need your help, so we've decided to beam you aboard and press you into the cramped cockpit of a terran fighter.

Now hit the fire button trooper and get weaving! Thats an order!

HINTS & TIPS:

Your objective is a high score. During the course of play rebels on the mining platforms will release pods to provide you with extra speed, firepower and weaponry.
